Military Status: Exempted

SUMMARY

AI Engineering graduate from College of Computer Science and Artificial Intelligence with a solid foundation in machine learning, deep learning, computer vision, and natural language processing. Experienced in building AI applications through academic and personal projects using Python and modern AI frameworks. A motivated and fast-learning problem solver seeking to contribute to innovative AI solutions while continuously expanding technical expertise.

EDUCATION

- **Pharos University in Alexandria – College of Computer Science and Artificial Intelligence**
  Bachelor of Artificial Intelligence | Graduated 2026
- **Victory college , Alexandria , Egypt** | Graduated 2022

TECHNICAL SKILLS

- **Programming languages** : Python, Java , C++ , C# , SQL , Dart
- **AI/ML Frameworks & Libraries** : PyTorch , TensorFlow , Scikit-learn , OpenCV , Keras , Numpy , Pandas , Matplotlib , NLTK
- **Development & Tools** : Flask , GitHub , Visual studio , Android studio , Unity , Figma , Packet Tracer , Wire shark
- **Core Areas**: Machine Learning , Deep Learning , Computer Vision , Natural Language Processing, Data Science , AI Applications
- **Soft Skills** : Teamwork , Leadership , Problem-solving , Self motivated

PROJECTS

Graduation Project : OFF-SIDE — AI Football Analytics Platform

- Engineered a real-time football analytics platform using **YOLO** and **ByteTrack** for player detection and tracking.
- Integrated **R3D-18** for sub-second football action recognition.
- Designed the system to support automated analysis of football match events and player movement.

GDPR-Compliant Cancer Mutation Analysis

- Built a bioinformatics system for detecting cancer-related mutations from **FASTA DNA** data.
- Implemented **Machine Unlearning** protocols to support **GDPR** compliance and data-removal requirements

Social Media Engagement Forecasting Engine

- Developed predictive time-series models to forecast user engagement metrics.
- Analyzed engagement patterns across social media platforms to support data-driven predictions.

Egyptian Currency Detection & Classification

- Trained a **CNN**-based Computer Vision model to detect and classify Egyptian banknotes.
- Evaluated the model under varying lighting conditions and viewing angles.

Real-Time Facial Recognition, Gender Identification & Segmentation

- Implemented a real-time Computer Vision pipeline for face detection and gender classification from live video
- Integrated image segmentation techniques for real-time visual analysis.

PROFESSIONAL EXPERIENCE & TRAINING

Machine Learning & AI Diploma — AMIT Learning | Jan 2024 – Aug 2024

- Completed a 220-hour intensive diploma covering Python, Data Science, Machine Learning, Deep Learning, Computer Vision, NLP, and MLOps.
- Achieved 97% overall with hands-on AI projects and practical implementations.

Artificial Intelligence Internship — ANRPC | Aug 2024

- Completed an AI internship focused on practical exposure to Artificial Intelligence and Dat Science.
- Gained experience applying AI concepts in a professional environment.

Mobile Application Development Using Flutter — ZA Tech | Oct 2024

- Completed training in cross-platform mobile application development using Flutter and Dart.

Full-Stack Development Diploma — Arabian Academy | Jul 2025 – Jul 2026

- Completed a 160-hour intensive training program focused on Full-Stack Web Development.
- Gained practical experience across front-end and back-end development concepts.

LANGUAGES

- **Arabic :** Native
- **English :** C1
- **Germany :** A1
